Market Field College's Career Programme

What is a Careers Programme?

A careers programme is a college plan designed to help you prepare for life after Market Field College. Think of it as a roadmap for your future!

It includes things like:

Advice to help you figure out what jobs or courses might suit you, work experience and visits to businesses to see what different jobs are really like, visits to 'next steps', and support with interviews, CVs, job applications...
...and so much more!

Essentially, it is here to help you discover your strengths, explore your options, and confidently take your next steps.

Our programme is published on our website.
